

# VIVEK PANDEY

Lucknow 226008, India | 9696006439 | vivek.csmajor@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Computer Science student specializing in backend development, with hands-on experience in Go (Gin) and cloud systems on AWS gained primarily through industry internships rather than personal projects. Proven track record delivering production-ready features across telephony, IoT, and VoIP platforms. Language agnostic by design, comfortable picking up new languages quickly, treating syntax as a detail on top of transferable core concepts. Strong foundation in data structures, algorithms, and Competitive Programming. Prioritizes clean, maintainable code over complexity.

## WORK EXPERIENCE

### Software Development Intern

May 2026 – Present

Vobiz.ai | Bengaluru, Karnataka, India

- Slashed S3 storage costs by 97.7% (lakhs/month to a few hundred rupees) by batching PCAP files into S3 archives, retrieved on demand via a 50M+ row path-index table, across 30+ EC2 instances.
- Built core SMS/RCS messaging features in Go for the SIP trunking platform, supporting large-scale AI conversations between voice agents and chatbots.
- Designed a call recording retention and custom billing system handling 5M+ calls a day.
- Diagnosed and fixed bugs across the platform's 30+ backend microservices, improving stability and reliability.
- Created a microservice to monitor carrier health and report to monitoring channels via a Slack bot.
- Contribute daily across the backend on a wide range of features, fixes, and improvements.

### Software Development Intern

September 2025 – December 2025

Devlume Software Solutions | Bengaluru, Karnataka, India

- Developed backend features across two projects using Python (Django, FastAPI) and Go (Gin), contributing to both API design and business logic layers.
- Built and integrated cloud-connected systems on AWS (IoT, console) to ingest and serve real-time industrial sensor data for a factory management platform (Wimera).
- Implemented Intercom integrations and VoIPmonitor packet capture/monitoring for a VoIP/SIP-based communications platform (Vobiz.ai).
- Performed systematic bug-fixes and code reviews, improving reliability and performance of existing backend services.

### PowerBI Developer Intern

May 2024 – September 2024

In-Sync | Gurgaon, Haryana, India

- Designed and built interactive Power BI dashboards using DAX and Power Query for data transformation, modeling, and business reporting.
- Delivered reporting solutions for enterprise clients including Audi Kolkata, Ezeepay, RupeeBoss, and Ques Corp.

## PERSONAL PROJECTS

### LAN-Based ICPC Platform (Server | Client | Cloud)

May 2026 – September 2026

- Built from scratch using Golang, a system spanning three applications that enables ICPC/CP contest organizers to conduct contests securely without internet access, with monitoring and control.
- Engineered a cross-platform, sandboxed judge engine from scratch using Golang to run submissions in multiple languages, with ICPC-style scoring and ranking and time/memory limits, fully offline.
- Created an admin dashboard for organizers to register teams, manage contests, and monitor participating teams.
- Created a cross-platform participant app with kiosk mode, fullscreen enforcement, and anti-cheating mechanisms, along with monitoring tools for admins.
- Created a hosted website where teams can download the contest app and organizers can create contests with custom problem statements and test cases.

## EDUCATION

### Bachelor of Technology – Computer Science & Engineering

August 2024 – July 2028

Amity University, Lucknow

CGPA: 8.3

### Indian Certificate of Secondary Education (ICSE)

City Montessori School, Lucknow

Score: 95.5%

## TECHNICAL SKILLS

**Languages:** Go (GoLang), C++

**Frameworks:** Django, FastAPI, Gin

**Cloud & DevOps:** AWS

**Data & BI:** Power BI, DAX, Power Query

**Other:** Competitive Programming, REST APIs, VoIP/SIP, Git
